DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 20 and 41-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sullivan et al (6,773,364). Sullivan discloses a golf ball core comprising concave portions corresponding to circular dimples on the cover. Note: layer 14 is considered part of the core. At least 60% of the dimples have a corresponding dimple in the core layer (see figure). The cover has a thickness from 0.5 to 1.27 mm (col. 11). One of ordinary skill in the art would vary the thickness of the cover for the desired durability.

Allowable Subject Matter

Claims 6, 7, 12-19, and 21-40 are allowed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
